

54link — Platform Brochure (DRAFT v0.1)

54link compiles, deploys, and showcases Africa's operational platforms. Nigeria is the first use case; the blueprint scales across all 54 countries.

THE PORTFOLIO

34 platforms compiled from 66 public repositories:

1. NDSEP / NGApp — National Data Sovereignty Enforcement Platform (NDPA 2023)
2. Meridian TaxTech — Nigerian NRS unified tax platform (compliance, gov enclave, inclusion)
3. Blue Economy Platform — Nigerian maritime PPP (24 services: tracking, insurance, ticketing, traceability)
4. UmojaFlowOS — Cross-border B2B payment orchestration (NGN/KES/ZAR)
5. AgricPlatform — Nigeria Farmer Platform (NYFN PRD v3.3)
6. Nexcomm Exchange — African agricultural commodity exchange
7. BIS — AML/CFT compliance intelligence
8. Unified SOS — Subnational digital governance & revenue (6 pilot states)
9. VPP — Open-source virtual power plant
10. FraudFusion — Multi-service fraud prevention
11. NextGen INSR — Nigerian insurtech (full value chain)
12. Payment Switch Onboarding (paygate / paymentswitch / crmaas)
13. RemitFlow — Cross-border remittance microservices
14. TaxStamp — Excise stamp issuance & verification
15. TourismPay — Multi-currency tourism payments
16. HealthLink — Healthcare data linkage
17. CRUSH — Healthcare fraud/waste/abuse operations
18. H2Fleet — Hydrogen bus fleet platform
19. INEC — Election management system
20. MineralVision — Mineral exploration & compliance
21. Lanai — Luxury travel concierge
22. Agora — Open-source AI receptionist SaaS
23. Singlewindow — Trade facilitation portal
24. Healthpoint — Healthcare data security (ML) ... plus 11 additional repositories in the portfolio.

CORE STACK

Go · Python · Rust · TypeScript Postgres (pgvector) · Redis/Dragonfly · Kafka · Temporal · Keycloak TigerBeetle ledger · Mojaloop FSPIOP · APISIX · OpenAppSec WAF Docker · Kubernetes (hybrid GitOps) · GitHub Actions CI/CD

DEPLOYMENT MODEL

Phase 1 — Dev environments on 54link infrastructure (Kubernetes), wired to government-agency sandboxes (NCS B’Odogwu, CBN TMS, NEPC, NIS). Phase 2 — Video walkthroughs published per platform as deployments ship. Phase 3 — Staging → production for Nigerian agency partners. Phase 4 — Replicate the playbook across additional African markets.

PARTNERSHIP MODELS

- Government: sovereign deployments, agency sandbox integration, capacity building
- Enterprise: platform licensing, integration engineering, managed operations
- Developers: open-source contribution, ecosystem tooling, paid build work
